Notice Regarding Approval of Revenue Projections Related to Wheeling Charges for a Subsidiary, YONDEN T&D

Our subsidiary Shikoku Electric Power Transmission & Distribution Company, Incorporated (hereinafter referred to as “YONDEN T&D”), submitted an application to the METI Minister on July 10, 2026, for adjustment to revenue projections related to wheeling charges, with the aim of appropriately reflecting rising prices, labor costs, and interest rates in its transaction prices and maintaining the construction capabilities and supply chain necessary for stable power supply.

(This was announced on July 10, 2026.)

Shikoku Electric Power Company announces that YONDEN T&D received approval from the METI Minister for the above-mentioned application today.

Going forward, YONDEN T&D will file a notification of the revision of the general provisions for wheeling services with the METI Minister, setting forth the wheeling charge unit prices to be applied from November 2026, in order to reflect the approved revenue projections in the Wheeling charges.

The concrete impact of this matter on our future consolidated financial results (income and expenditure) will be examined in detail, taking into account the contents of the notification of the revision of the general provisions for wheeling services of YONDEN T&D and the progress of our internal deliberations on reflecting the revision of wheeling charges in our retail electricity tariffs.
